## EDUCATION

### CAREERFOUNDRY

Full-Stack Immersion, 2021

Developed a fluency in HTML5, CSS3, JavaScript, React, and Node.js

## PERSONAL PROFILE

Full-stack web developer with a solid understanding of HTML5, CSS3, JavaScript, and React. Customer service and teaching background has led to a deep understanding of end-user wants and needs. Strengths include teamwork, intuition, empathy, and problem-solving to create beautiful and dynamic applications.

## WEB DEVELOPMENT PROJECTS

### myFlix Movie Application

- Built movie database with MongoDB containing user and movie data
- Created REST API endpoints using express
- User interface built with both React and Angular (two different applications)
- Users can create new account, login, edit information, view movies, and add to list of favorites

**Active:** <https://bfab11.github.io/myFlix-Angular-client/welcome>

**Github:** <https://github.com/bfab11/myFlix-Angular-client>

### Meet

- Serverless, progressive web application (PWA) built with React using a test-driven development technique
- A meet up app that shows upcoming events. Can filter by city, specify number of events, use app offline, and add app shortcut to mobile home screen
- Application uses Google Calendar API to fetch events

**Active:** <https://bfab11.github.io/meet/>

**Github:** <https://github.com/bfab11/meet>

## EXPERIENCE

### Apple Inc.

May 2015 - Aug 2021

- Advised and educated customers in Apple products when they were unsure of which products were best suited for them which led to increased customer satisfaction and sales
- Demonstrated an immense enthusiasm for new information on products and services to increase overall knowledge to further assist customers with their wants and needs

### Mikuni Restaurant and Sushi Bar

Sep 2018 - Feb 2021

- Mentored and trained newer servers which developed a strong serving staff
- Utilized my quick thinking and problem-solving during high pressure situations, such as dinner or weekend rushes, to increase customer satisfaction
